

ELYSIUM VHR USER WORKSTATION REQUIREMENTS

Elysium VHR users require workstations with the following minimum hardware/software configurations. Please note: version numbers are critical.

- A PC compatible with a Pentium, or similar processor
- 4 gigabytes of hard disk space available
- Windows 2000, Windows XP, or Windows Vista Operating System
- 256 MB or more of RAM
- A display that supports at least 256 colors and at least 800- by 600-pixel resolution*
- Internet connection: A high speed internet connection such as a cable modem, DSL line or T1 is recommended
- [Microsoft](#) Internet Explorer 6 or higher including IE 7.x*
- For printing, an ink jet type printer is a minimum requirement, a laser printer preferred

** The new Repository user interface is optimized for screen resolutions of 1024 by 768 but is also compatible with screen resolutions of 800 by 600. With lower resolutions, more vertical and horizontal scrolling will be required to view all reports and results, particularly on the Summary Tab.*

** For the VHR to work in IE 8, click on the compatibility button in the menu options.*
