HealtheConnections and Health-Related Social Needs (HRSN) Data Exchange

HealtheConnections supports **New York's 1115 Medicaid Waiver and Social Care Networks** by enabling secure health-related social needs (HRSN) data exchange for Medicaid patients.

HealtheConnections role is to:

- ✓ Collect, validate, and share HRSN data (screenings, assessments, referrals) in collaboration with the Statewide Health Information Network for New York (SHIN-NY)
- ✓ Support secure data exchange between providers and Social Care Networks (SCNs)
- ✓ Enable timely, compliant data workflows

How Providers Participate

Providers can play a key role in identifying and addressing the social care needs of their patients by engaging with their regional SCN.

There are multiple ways for providers to share HRSN data:

- ✓ **HealtheConnections: Exchange via the Health Information Exchange (HIE):**
  - **EHR-to-HIE Integration**
  - **sFTP Flat File Exchange**

- ✓ **SCN Program: Engage through your regional SCN on the Unite Us platform:**
  - **Care Compass Collaborative**
  - **Healthy Alliance**
  - **Hudson Valley Care Coalition**

Not sure what's the best method? **Contact us** for a quick consultation.

HealtheConnections Support

If you're ready to get started or have questions, HealtheConnections is here to help. Contact us at **support@healtheconnections.org** or (315)-671-2241 extension 5.
