Smarter alerts are here.

Know when your patients receive hospital care with Statewide Encounter Alerts.

SHIN-NY Statewide Encounter Alerts (SEAS) give Community Health Centers timely inpatient and emergency department admission, discharge, and transfer notifications from 100% of New York hospitals—all through Azara's Transitions of Care Module. That means greater visibility when and where it matters most.

- One statewide connection, seamlessly available in your existing workflow
- More complete alerts from all hospitals across New York
- Centralized monitoring and measurement for improved data quality
- Works alongside your existing SHIN-NY QE partnerships

Connect now for greater visibility into patients' transitions of care.

azara healthcare

COMMUNITY HEALTH CARE ASSOCIATION of New York State

ONE STATEWIDE CONNECTION.

More complete alerts from hospitals across New York.

1. Hospital event

Inpatient or emergency department admissions, discharges, or transfers (ADTs)

2. Statewide delivery

HealtheConnections sends the ADT via SEAS

3. Existing workflow

The care team receives the ADT in Azara's Transitions of Care Module

Statewide alerts, available directly into your workflow.

Getting Started Is Simple.

Contact HealtheConnections to confirm eligibility—even if you already use Azara's Transitions of Care Module. Setup is minimal, and Azara and HealtheConnections will walk you through it.
