A: The patient information you will see is based upon:

Consent - Patient has a “YES” consent on file for the given organization

Named Provider - The provider for the patient is listed on the file, based on NPI

Public Health - The patient lives in the county under the covered public health entity

Contribution - Your organization has provided data on the patient within the last two years, without having a “NO” consent on file.

myData Attribution List (aka Active Patient Roster) - Your organization has a myData account and the patient is included in your attribution list, without having a “NO” consent on file.

Alerts Subscription List - Your organization has myAlerts set up for the patient, without having a “NO” consent on file.

Accountable Care Organization (ACO) Consent Model - If you’re a part of an ACO, the patient must have a “YES” consent to one of the ACO partners without having a “NO” consent from any other ACO partner to grant access to that patient’s medical information.

B: Report data can be exported to a CSV file for offline viewing.

C: Options for filtering the reports are found in the filters panel.

Please Note: The information in this report is updated once per day and provided to us by the NYS Department of Health. If the lab who produced the result is not currently contributing data to HeC, the information may not be visible within Patient Lookup.
