

Receive and view diagnostic-quality images through our universal viewer, or even in your own system.

Image Exchange

HealthConnections is the image exchange leader in New York State, with capabilities among the best in the nation. We partner with an ever-expanding group of diagnostic centers, including hospital-based and independent regional radiology centers that contribute imaging studies to the health information exchange.

Stop cancelling appointments due to missing or corrupted discs

No need to leave your imaging system

No more phone calls to track down imaging records

Zero Cost

No Special Equipment or Software

X-rays, CTs, MRIs, mammograms, and more are available in a universal viewer via the myConnections portal, which means you don't need an electronic health record (EHR) to use it.

Satisfy Quality Performance Measures

If you do have an EHR, take delivery of reports and images through our Results Delivery service, which will assist in satisfying MIPS/MACRA requirements.

Before we were making phone calls, sending faxes, a lot of leg work. Now, we can go look the information up... and have it ready before the patient even starts the exam.

Save Time, Save Money

- + Eliminate reliance on patients to bring their required images to the visit
- + Reduce repeated patient visits due to incomplete records

Prefer to stay with your own system?

- + With Transfer-to-PACS, you're able to access any available images in HealthConnections without ever leaving your own system. Take images from the myConnections portal and pull them directly into your PACS, eliminating the need for discs or a separate viewer.

To learn more about Image Exchange and how it can help your organization, send us a message at info@healthconnections.org or call us at **315-671-2241 x5**.
