

Reports delivered directly to you or at your fingertips through the portal.

Results Access & Delivery

With Results Access & Delivery, you have the reports you need right when you need them through two different avenues. Since HealtheConnections is web-based, you have the option to access reports directly through the myConnections portal, a function called myResults. If you have an electronic health record (EHR) system, HealtheConnections can route results directly to your EHR. This is called Results Delivery.

Results from hospitals, labs, and radiology centers

Convenient routing options available

No need for a lab interface

Zero Cost

RECEIVING RESULTS
PER MONTH

I sent a culture to a local laboratory for a patient who had a serious corneal ulcer and the lab was not able to locate the result. So, we signed on to [HealtheConnections] and got the culture result instantly while the patient was in the office. [HealtheConnections] not only helped save his vision, but relieved a big headache for us.

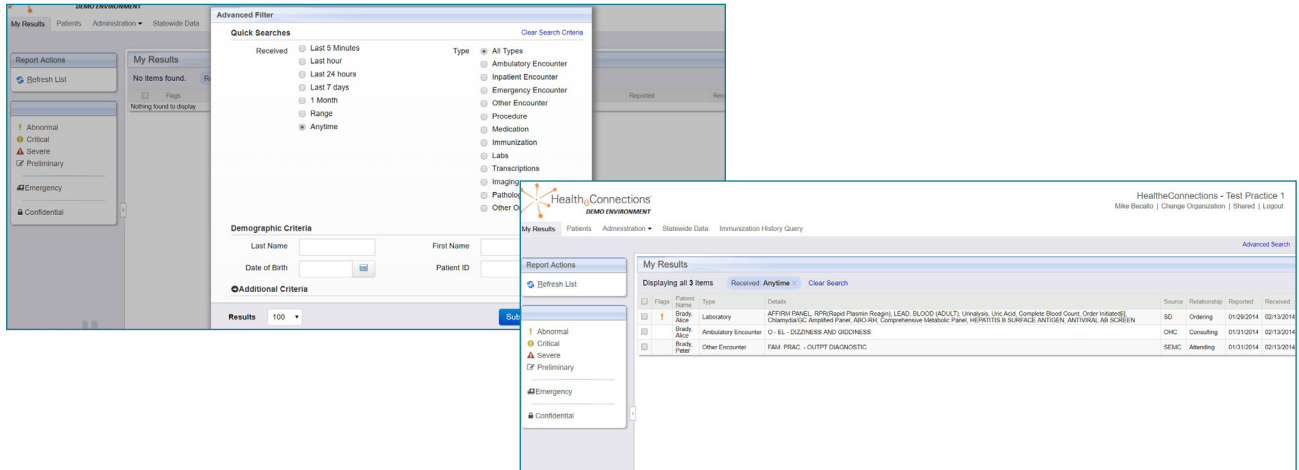

ROBERT WEISENTHAL, MD
OPHTHALMOLOGIST

With myResults, view reports directly in the HIE or download to your own system with just a few clicks. You don't need an EHR system for this - it's all web-based.

Need images?

Our image-enabled Results Delivery function sends the report and image link directly into your system.

Intuitive user interface allows for easy searches, filtering, and document review.

Quality Performance Measures

Results Delivery is available with connected EHR systems and can assist providers in attaining MIPS/MACRA, PCMH, or other CMS Innovation Center initiatives.

For providers participating in those initiatives, you can meet many of the Improvement Activities or Quality measures, such as those focusing on practice improvements for bi-directional exchange of patient information and more.

To learn more about Results Access & Delivery and how it can help your organization, send us a message at info@healthconnections.org or call us at **315-671-2241 x5**.
