

hospitals

HealthConnections can provide crucial information when it's needed most – at the point of care. The results are better communications, improved provider experience and enhanced patient care.

get immediate information on a patient

Download laboratory results, radiology reports, medications, allergies, problem lists, and more.

view a patient's medical images

Easily access and view diagnostic-quality images without any special equipment.

follow-up with the patient's primary care provider or a specialist

Send and receive visit notes electronically with other organizations or reference our National Provider Directory to find the right contact.

reduce readmission rates

Easily access and understand patient profiles to identify gaps in care.

How Can HealtheConnections Help You?

patient lookup

Consolidated patient information from hundreds of data sources creates a comprehensive clinical record, available at the touch of a button. Medications, allergies, medical history, labs, and more!

direct mail

Secure, HIPAA-compliant communication for fast and easy care coordination. The intuitive system allows for live chat, sending and receiving attachments, and contains a national provider directory to connect you to referral partners.

myData

Easily access and understand patient profiles to identify gaps in care. Providers can view their patient's data from not only their system but community-wide data, with a full suite of dashboards, registries, and reports to support care and chronic disease management.

image exchange

View diagnostic-quality images easily and efficiently for comparative studies directly in the provider portal or have them delivered into your own PACS through Transfer-to-PACS.

query-based exchange

Connect to other state and federal partners including other regional HIEs, the New York State Immunization Information System, and more.
